Price: Each 50c. Doz. \$5.00
Add 10 per cent for postage on orders under \$1.50

MAKE SELECTION AND ORDER TODAY

DOROTHY PAGE-ROBERTS

A bud that is long-pointed, glowing pink, becoming a large, double, fragrant, coppery pink bloom with a suffusion of yellow describes this Rose. The bush is a vigorous grower, blooming freely in June, with some flowers all Summer.

LUXEMBOURG

One of the few good yellow Roses. A free and heavy bloomer.

AMI QUINARD

The soft old-rose fragrance makes this Rose doubly delightful. The buds open into large, velvety maroon crimson flowers with a blackish luster.

DAME EDITH HELEN

Clear rich pink. Stems long and strong and fine for cutting. A good Rose for exhibition purposes.

DAME EDITH HELEN

KATHARINA ZEIMET. Multitudes of pure white, miniature flowers. Fragrant. Best grade 2 yr. plants, 35c. each, \$3.50 per doz., \$12.50 for 50 plants, postpaid.

Here Are Simple Hints for Growing Prize-Winning Roses

Time to Plant—We advise Fall planting when and where possible. You should be guided by climatic conditions in your section and the experience of successful local gardeners. We usually begin shipping about October 1 and continue until April 1, but find late Spring plantings do not survive the first Summer as well as the earlier plantings.

Any good soil, in a sunny location, and away from trees and shrubbery is right for Roses. The soil should be spaded or plowed deeply, and all plant-food placed as far down as possible or broadcast on, but avoid having fertilizer or plant foods in direct contact with the roots.

Should watering be required in dry weather, be

sure to soak the soil thoroughly. A light sprinkling is almost useless. Good cultivation and loose top-soil, or a mulch of peat moss, is surely as important as watering.

Mildew and black spot may be controlled with a mixture of 9 parts dusting sulphur to 1 part arsenate of lead applied weekly with a dusting gun or muslin bag.

When cutting the blooms, be sure to let two leaves remain on the branch (*See illustration*).

We cannot control cultivation, soil conditions, or moisture, therefore we regret to say that

WE CANNOT GUARANTEE THE PLANTS TO LIVE

Roses must have ample drainage. If soil is heavy, excavate to depth of 12 inches, put 4 inches of coarse cinder in bottom and add 8 inches of good loam with some clay. The addition of well rotted cow manure is advised.

Our Guarantee

We guarantee to deliver our Roses to you in first-class growing condition, and that they are true to label. Should you receive a Rose plant from us which proves to be untrue, we will replace same without cost to you. We have no control over the forces of nature and the care plants will receive; hence we cannot guarantee them to live.

Our Roses have bloomed profusely one year before being shipped to you; with proper care they will begin blooming early the first Summer.

Please Note: We do not prepay transportation charges on orders amounting to less than \$1.50. Purchaser must pay such charges. Get your friends and neighbors to club with you and obtain the better rate for large orders. Good, dependable Roses cannot be bought cheaper.

A. Shows depth to plant.
B. Shows where plant was budded.

Rose plant with top cut back and long roots shortened

The result of proper planting and pruning

The black line shows where to cut. Let two leaves remain on the bush
